

BP Canada Energy Company Exploration and Production Health, Safety, Security and Environment Policy

Everyone who works for or on behalf of BP Canada Energy Company - Exploration and Production is responsible for health, safety, security, and the environment (HSSE). Making this a priority in our everyday performance is critical to our individual success and the success of our business.

Our goals are simply stated - no accidents, no harm to people and no damage to the environment. In addition, prevention of pollution, management of natural resources for sustainability and continual improvement are vital components and key to our success.

As a team, we will set and review objectives and targets as a part of continual improvement to drive down HSSE impacts of our operations by reducing waste, emissions and discharges, using energy efficiently, and assuring a safe work environment for our employees.

We are committed to:

- **comply** with relevant legislation and regulations, and with other standards to which the Canadian Exploration & Production Performance Unit subscribes;
- **consult**, listen and respond openly to customers, colleagues, neighbours, public interest groups and those who work with and on behalf of us;
- **work with others** - partners, suppliers, competitors and regulators - to raise the HSSE standards of our industry;
- **openly report** our HSSE performance, good and bad;
- **recognize those who contribute** to improved HSSE performance.

As employees, contractors, managers and leaders of BP Canada, we are committed to making this HSSE our priority.
